MID-AMERICA ORTHOPAEDICS

The Alzein Pediatric Urgent Care facility underwent a complete remodel to create a modern, child-friendly environment designed to enhance patient comfort and streamline medical operations. The renovation was completed in April 2019 and focused on both aesthetic and functional improvements.

The remodeled Alzein Pediatric Urgent Care features a welcoming reception area with playful design elements, bright and airy waiting areas, wide and well-lit corridors, and soothing, modern exam rooms. The design creates a cheerful and comfortable environment for young patients and their families, combining functionality with warmth and appeal.
